

Builder Commitment Contract

WantedBy — Real-Time Product Pain Intelligence Platform

PREAMBLE

This contract is entered into by **Shahriyar Ahmed Mahir** (hereinafter "the Builder"), sole owner and originator of the WantedBy project. This document formalises a personal commitment to design, build, and ship WantedBy to a production-ready state — without exception, without abandonment, and without compromise on the core vision.

COMMITMENTS & OBLIGATIONS

- | | |
|-------------------------------------|---|
| I. Ownership & Origination | I, Shahriyar Ahmed Mahir, am the sole originator, architect, and owner of WantedBy. This project was conceived, scoped, designed, and initiated by me. I accept full responsibility for its outcome. |
| II. Commitment to Completion | I commit to completing WantedBy to a production-deployed, publicly accessible state — regardless of technical difficulty, time required, or obstacles encountered along the way. Abandonment is not an option. Pivots in scope require written revision to this contract. |
| III. Minimum Weekly Time Investment | I commit to a minimum of 5 hours per week dedicated exclusively to WantedBy — with a target range of 15 to 20 hours per week during active build phases. This time covers design, development, testing, deployment, and community building. Weeks with less than 5 hours require a documented reason and a make-up commitment the following week. |
| IV. Build Quality Standard | I commit to building WantedBy to a professional, portfolio-grade standard. This means: typed code throughout, tests covering all critical paths, structured logging and observability from day one, infrastructure as code, and no hardcoded secrets or credentials anywhere in the codebase. |
| V. Launch Obligation | I commit to publicly launching WantedBy — at minimum as a live, accessible product at wantedby.vercel.app — within the 8-week build timeline defined in the Technical Specification v1.0. The launch includes a Reddit post, a Show HN submission, and a minimum of 20 email signups targeted before or on launch day. |

VI. Documentation & Handoff

I commit to maintaining the Business Specification and Technical Specification as living documents — updated when scope changes. All architectural decisions are documented. The codebase README is kept current so any developer could onboard within one hour.

VII. Accountability

I accept that the quality of this project reflects directly on my professional reputation as a software engineer and builder. I commit to holding myself to the same standard I would hold any professional team delivering this product.

SIGNATURE & DECLARATION

By signing below, I acknowledge that I have read, understood, and fully accept every commitment stated in this contract. This is a binding personal declaration of intent and professional obligation.

FULL NAME	ROLE	DATE
Shahriyar Ahmed Mahir	Owner & Originator — WantedBy	June 2026

SIGNATURE

Signed in good faith. This commitment stands from the date above until WantedBy ships.
